# 選用unity 的原因

- Rpg maker 要錢
- 大部分遊戲用unity做
- 不信unity 很難做 🤔 🤔

# Motivation

## 動機

# 動機 1

- 想要是著嘗試寫一個  
屬於自己的遊戲  
同時也了解開發的過程

## 動機 2

- 認為在線上玩過的  
免費遊戲畫質都不好、  
角色很卡、時常有bug

## 動機 3

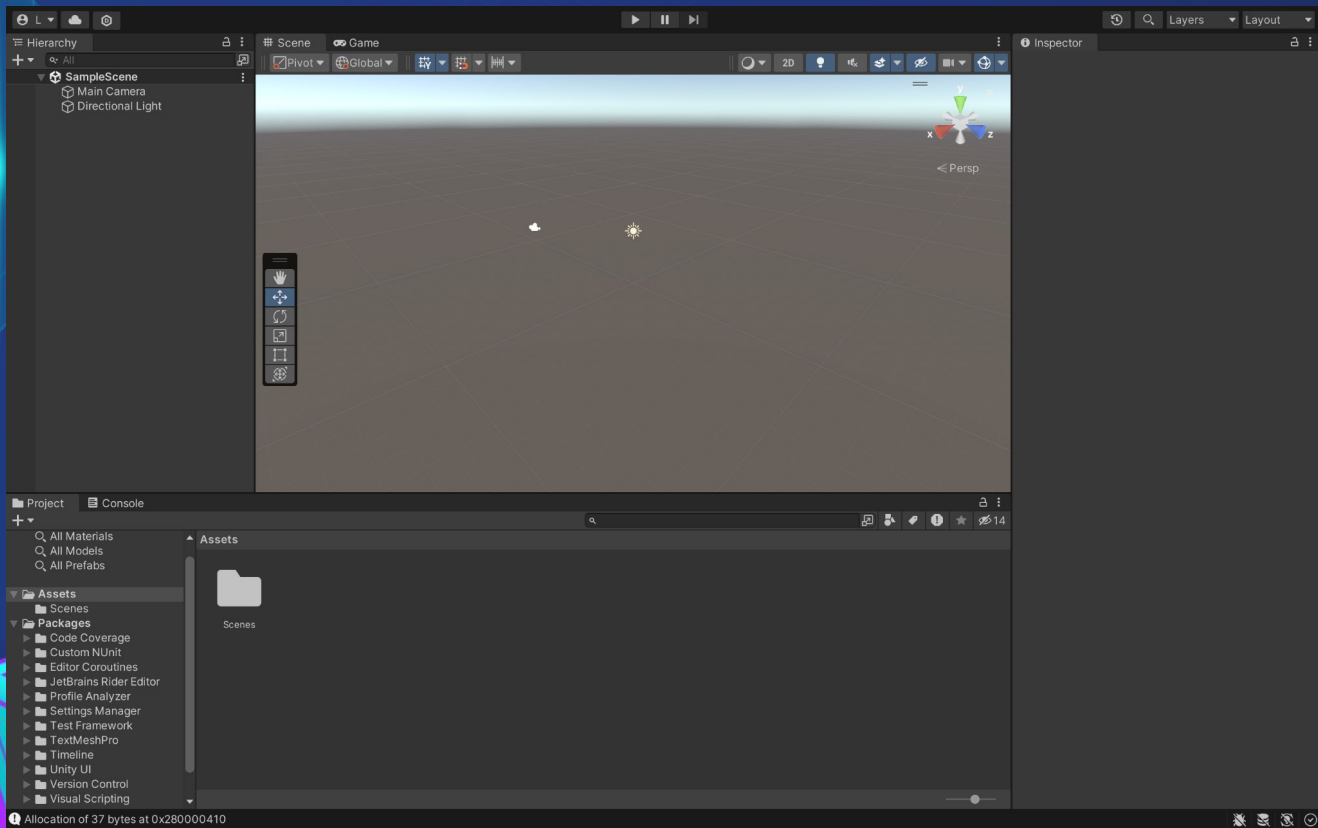

- 給自己挑戰

已學過C 和部分C++

## FULL 3D DASH ABILITY in 11 MINUTES - Unity Tutorial

In this video I'm going to show you how to code a full 3D Dash ability in Unity. Including dashing in multiple directions based on player input, keeping the momentum after dashing and adding camera effects to make the dash feel more alive.

If this tutorial has helped you in any way, I would really appreciate it if you leave a like in return. And you can also subscribe to this channel if you want to see more tutorials like this one.

The Terrain Sample Asset Pack contains a collection of assets to jump-start development for users interested in utilizing Unity's Terrain system. It includes high resolution heightmaps of various Terrain features that are ideal for stamping. There are also Terrain Layers with high quality PBR-ready Textures for painting materials onto the Terrain. For the best Terrain editing experience, we recommend using the Package Manager to additionally download the Terrain Tools package (<https://docs.unity3d.com/Packages/com.unity.terrain-tools@4.0/manual/index.html>).

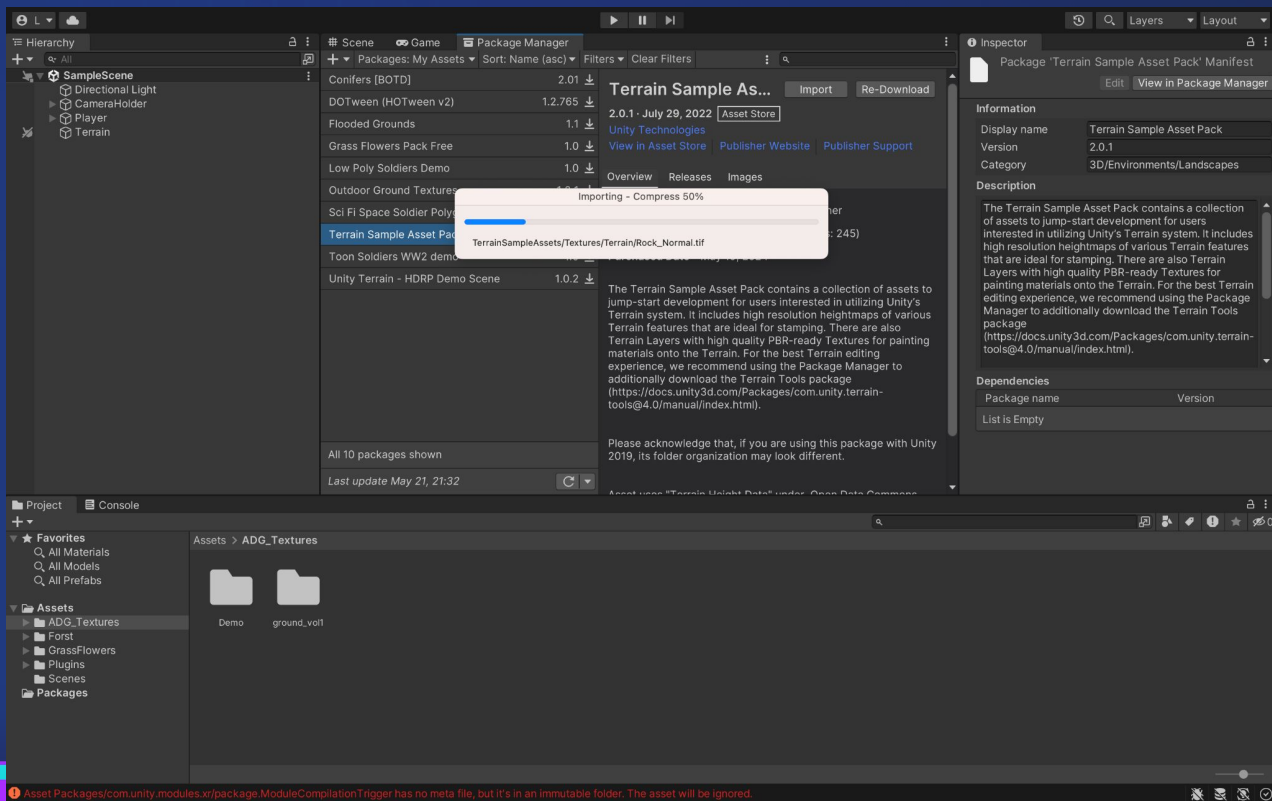

Please acknowledge that, if you are using this package with Unity 2019, its folder organization may look different.

# 成果

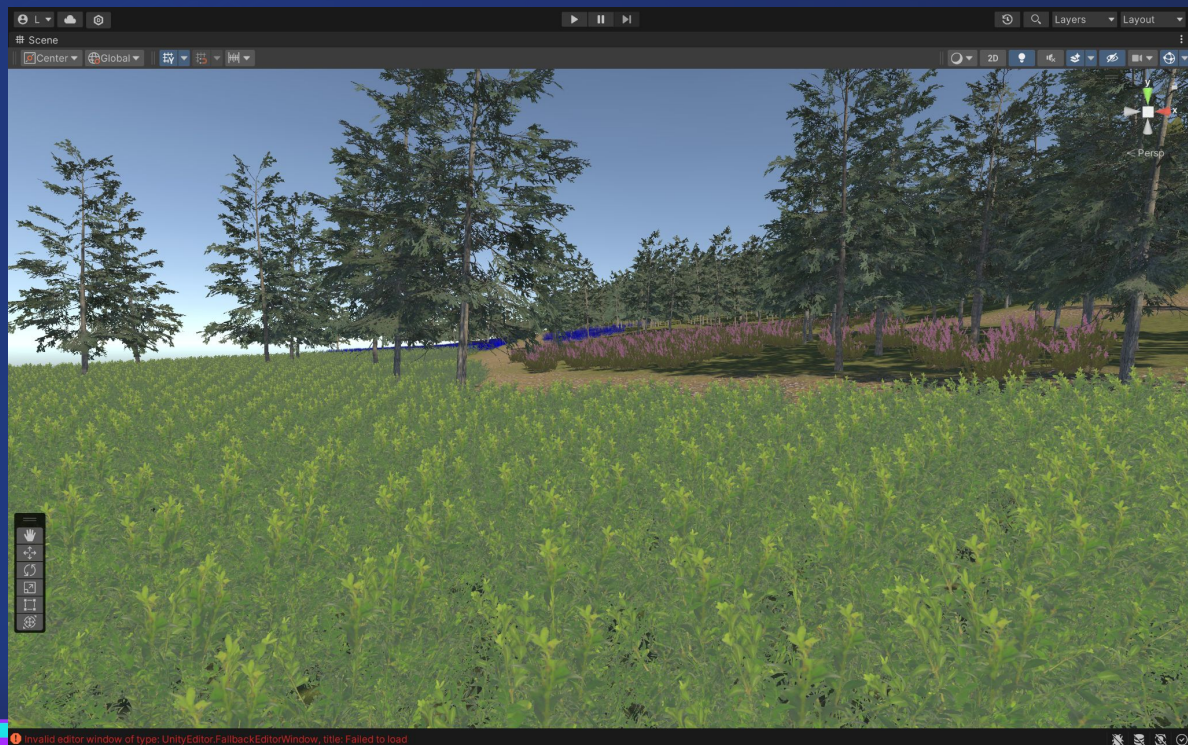

# 成果

# 成果

# 心得

- 新手沒事不要用 unity
- 建議有程式基礎再寫遊戲

- 一個完整的遊戲都需要很大的團隊支撐

Ex:原神

團隊最初有150人，他們低估了開放世界的開發難度，因此到2019年中成長為300人，2020年4月已有500人，2021年2月則有700人

一個遊戲的創作真的不簡單  
真的不應該去批評他人的創作

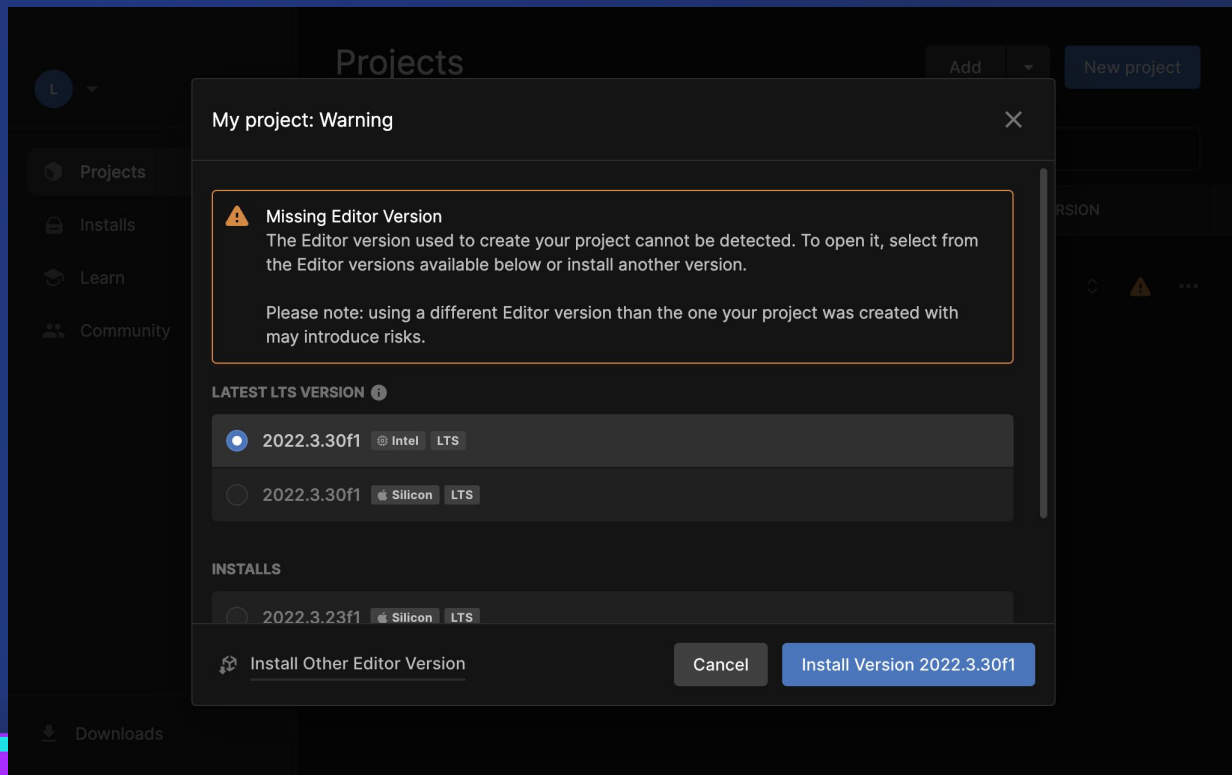

我是一个经不起批评的人

如果你批评我  
我虚心接受 坚决不改
